

KOMAL SINGH

M365 POWER PLATFORM DEVELOPER [MICROSOFT CERTIFIED]

Lucknow, Uttar Pradesh, 8576874377 (ks6170491@gmail.com) 

Portfolio Url : <https://komal123singh.github.io/portfolio.github.io/index1>

SUMMARY

- I am a dedicated Software Developer with approximately 4 years of experience in the IT industry, specializing in a wide range of technologies including SharePoint Framework (SPFx), Power Platform technologies, Azure Logic Apps, and more. My expertise spans both frontend technologies such as HTML, CSS, and TypeScript, as well as backend technologies like SQL (Structured Query Language).
- With a strong passion for staying current with emerging technologies, I continuously seek opportunities to expand my skill set and adapt to the ever-evolving landscape of the corporate world. I am a detail-oriented, hardworking professional known for my excellent analytical and logical thinking skills. I thrive in fast-paced environments and am committed to delivering high-quality solutions efficiently and effectively.

TECHNICAL SKILLS

Sharepoint Framework (SPFx)

Power Platform (Power Apps, Power Automate, Power BI etc.)

Sharepoint Powershell Scripting

Front End Technologies(Html, CSS , React JS , Typescript,...)

Azure Logic Apps, Key Vault

Office 365 Apps(MS Word , MS

Powerpoint , MS Excel)

Migration Tools - SPMT , Lotus Notes , Quest Migrator.

PROFESSIONAL EXPERIENCE

Analyst-I Cloud Engineer at DXC Technology, Lucknow , India

Mar 2021 - Present

- Developed a cloud-based application that is highly available and fault-tolerant, utilizing Azure Logic Apps for seamless integration and workflow automation.
- Led the migration of the company's IT infrastructure to the cloud, using tools such as Lotus Notes, Quest, and the SharePoint Migration Tool (SPMT), resulting in improved scalability, performance, and reduced downtime during the transition.
- Implemented automation processes leveraging Azure Logic Apps and other cloud-native services, significantly reducing manual tasks and enabling faster deployment of new cloud resources, enhancing overall operational efficiency.

PROJECTS

Claims Application Development

February 2022 – February 2023

Technology Stack: SharePoint Framework (SPFx), ReactJS, Power Automate, Azure Logic Apps

Description:

- Developed and implemented a Claims Application using SPFx with ReactJS and Power Automate to automate the request creation process within a SharePoint site, meeting the client's specific requirements.

Responsibilities:

- Designed and developed a user-friendly UI for SharePoint, enabling seamless request creation and display of forms when new requests are generated within the site.
- Implemented Power Automate flows to automate the deletion of items after a specified number of days, aligning with client requirements and improving data management efficiency.

OneDrive Data Migration

July 2023 – January 2024

Description:

- The OneDrive Migration project involved migrating content from users Home Share directories to SharePoint OneDrive. This migration process was facilitated by utilizing the SharePoint Migration Tool (SPMT), ensuring the smooth transfer of large datasets while maintaining data integrity and minimizing downtime.

Responsibilities:

- Created and managed CSV files based on the file size and data migration requirements provided by users to effectively migrate data.
- Utilized the SharePoint Migration Tool (SPMT) to upload the CSV files, automating the migration process from the source paths to the designated destination paths as specified in the CSV files.
- Worked collaboratively with the team to ensure the accuracy of the migration, address any issues encountered during the process, and meet client timelines.

Service Management – Full Stack Program

May 2024 – August 2024

Technology Stack : Power Apps, Power Automate and Power BI

Description:

- Developed a comprehensive portal to launch the Full Stack Program, featuring a fully functional registration form, a dashboard, and multiple pages for navigating various program-related links and resources.

Responsibilities:

- Designed and developed a Canvas App to facilitate user registration for the Full Stack Program, ensuring an intuitive and seamless registration process.
- Created dynamic views and pages that allowed users to filter and manage requests based on different statuses such as Approval, Pending and more, improving the workflow efficiency.
- Developed an interactive Power BI dashboard and report, providing real-time insights and visual representation of program data, allowing stakeholders to monitor progress effectively.
- Automated the approval process and report generation using Power Automate, streamlining the flow of information and ensuring reports were sent directly to SharePoint for easy access and tracking.

EDUCATION

Dr. APJ Andul Kalam Technical University, Lucknow

Aug 2016 - Aug 2020

Bachelor of Technology in Computer Science and Engineering (8.9 CGPA)

BNIC , Lucknow

May 2014 - May 2016

Intermediate Education in PCM - (94%)

BNIC , Lucknow

May 2013 - May 2014

High School Education in Maths & Science - (90%)
